The Smarter Way To Charge a Honda EV

e:PROGRESS is an advanced charging service exclusively for Honda EV drivers.

This intelligent charging subscription service ensures that users purchase the best value electricity, all managed through an easy-to-use app.

Intelligent Charging automatically manages EV charging for you, helping you save money, time, and carbon.

e:PROGRESS connects to your car, your charger, and your tariff to schedule the cleanest, greenest, or lowest-cost time to charge.

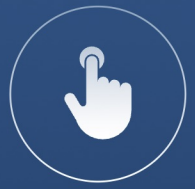

HONDA
The Power of Dreams

Save Money

e:PROGRESS reduces your charging costs. Use Intelligent Charging with dynamic, dual, or flat rate tariffs and minimise the cost of charging at peak times.

Enjoy further savings by using e:PROGRESS with your solar panels.

Save Time

The e:PROGRESS app is easy to use. Set up your e:PROGRESS app, then connect your EV to benefit from Intelligent Charging.

Save Carbon

Use Intelligent Charging to charge at the cleanest, greenest time. Combine with your solar panels to further reduce your carbon emissions per mile.

Other Benefits and Features

- Designed by Honda for your Honda EV
- Hardware-free solar integration
- Choice of intelligent charging modes
- Automatic scheduling with manual override
- High quality 7.4kW Honda approved chargers
- Supports any electricity tariff
- Easy-to-use App for iPhone and Android
- Qualified site survey and required approvals
- Professional installation with three-year warranty

e:PROGRESS

Intelligent Charging

e:PROGRESS connects your car and your charger to save money, time, and carbon.

e:PROGRESS is an advanced home charging service exclusively for Honda drivers. Intelligent Charging makes sure your car charges in the cheapest, cleanest and greenest way.

When the vehicle is connected to the charger, the e:PROGRESS app and subscription will automatically generate an Intelligent Charging plan for the driver.

The personalised Intelligent Charging plan takes into account the current level of charge, the desired level of charge, tariff cost, and optimisation mode preference.

HONDA
The Power of Dreams

e:PROGRESS

The e:PROGRESS app is easy to use and connects your car, your charger, and your tariff.

Use the e:PROGRESS app to save time, carbon, and money with Intelligent Charging.

- Choice of intelligent charging modes
- Supports any electricity tariff
- Professional installation with three-year warranty

e:PROGRESS is a subscription service and subject to an annual fee. First year is free.

For latest fees, search Honda e:PROGRESS.

HONDA
The Power of Dreams

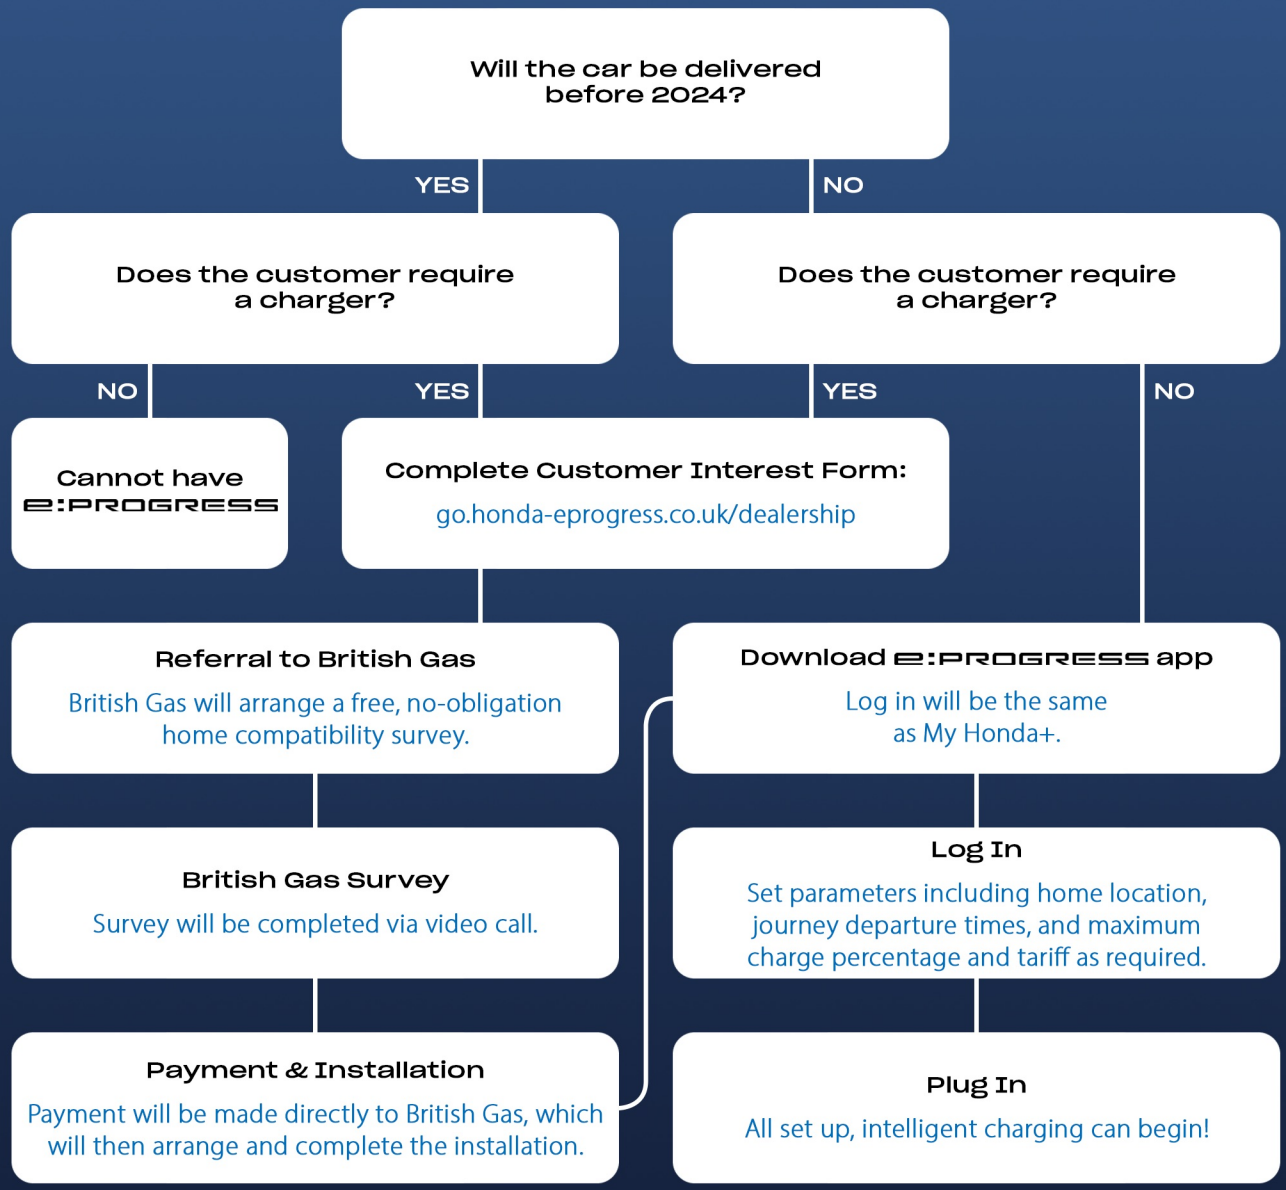

e:PROGRESS

e:PROGRESS is not compatible with public or workplace charging.

Prior to 2024, Honda e and CR-V Plug-In customers will need the Honda-supplied charger to access the service.

Eve Single S-line

Alfen's Eve Single S-line has been designed specifically for home use by offering the benefits of genuine smart functionality at an affordable price.

Its single 3.7kW - 7.4kW charging socket is housed in a compact, UV-resistant, polycarbonatecase which is lightweight, yet durable. The charging station can be wall-or pole-mounted to suit the situation. A tethered version with plug and cable storage facility is also available.

Designed for charging in a domestic environment, the charger uses LED indication lights to communicate the charging status.

HONDA
The Power of Dreams

- Type 2 socket
- LED status indication
- 370x240x 130mm (LxWxD)
- Tethered cable with Type 2 connection and integrated plug holder
- 3.7kW-7.4kW
- Wall mounting or with optional mounting post

Frequently Asked Questions

Can the customer keep their current energy supplier?

Yes, they can. e:PROGRESS works with any dynamic, dual rate or flat rate tariff. However, drivers should consider switching to Agile Octopus or a dual rate EV tariff to receive the maximum benefit from Intelligent Charging. e:PROGRESS will support more innovative energy tariffs as they come to the market.

Will the Eve Single S-line charger work with other electric vehicles?

The Eve Single S-line charger will charge any EV. However, you must have a compatible Honda EV to use e:PROGRESS and benefit from Intelligent Charging.

How much does the e:PROGRESS Intelligent Charging subscription cost?

New subscribers get the first year free. Please refer to the e:PROGRESS website or your local Honda Dealer for the latest price from second year onwards.
